RM65

ROTAMIXERS are robust forced action mixers that are designed to mix all those materials that can't be successfully mixed in a conventional free-fall cement mixer

The ROTAMIXER Tub mixers based on the RM65 model, include the RM90 & RM55, are 2hp electric machines with 110 volt high torque motors and sealed gear boxes; 240 and 415 volt or air powered motors are available

The rotating drum produces a centrifugal mix & the technically designed paddles generate radial & axial action; the paddles mix right up to the tub sides & base

The machines are easy to clean and parts are quick to change; replacement mix tubs are economically priced

The RM65 is the ideal mixer for up to 3 bags of repair mortar & grout, epoxy, screeds, flooring latex & self levellers, cements, adhesives, coatings & special plasters
