

# KIK-LOC ANCHOR

FOR KICKERLESS  
WALL CONSTRUCTION

## DESIGN:

- Very Robust - Steel construction with plastic end caps
- Quick and easy adjustment
- Long body giving solid fixing

## ADVANTAGES:

- Easily assembled
- No tools required
- Unique locking system
- Cost effective
- Time saving
- Eliminates costly set-up of kicker shuttering

## METHOD OF APPLICATION:

- 1) Simply push the main body of the KiK-Anchor into the fresh concrete slab on the approximate centre line of wall to be formed.
- 2) Once the concrete has set, the spacer rod can be easily and precisely adjusted by pinching the spring mechanism to allow spacer rod to move from side to side

Standard size available:

CODE	WALL WIDTH (mm)	PACK SIZE
