

Pieri® Cire E-31

(formerly Eurocire 2000)

Releasing wax for architectural concrete

Description

Pieri® Cire E-31 produces architectural concrete surfaces of very high quality, on elements made with white, grey, or coloured cements.

After drying, Pieri Cire E-31 forms a fine waxy film on the mould surface, which promotes a smooth, glazed, and bubble-free concrete, which is perfectly homogeneous in colour.

Applications

Architectural concrete elements intended to be off-form or to have a subsequent surface finish, such as sandblasting, polishing, grinding, acid etched or bush-hammered.

Directions for use

Pieri Cire E-31 should be used on clean steel or sealed timber moulds. It should be applied by spray with a suitable pressure to ensure an even application, at the rate of 20 to 25 m²/litre.

A drying time of about 15 minutes is recommended before pouring concrete.

Technical Specifications

- Straw coloured.
- Density: 0.81 ± 0.02.
- Viscosity: < 7 cSt ISO cup N° 2431 at 20°C.
- Flash point: 37°C (SETAFLASH method).
- Recommended Pieri nozzle X5 and X8.

Storage

2 years in unopened original packaging.

Packaging

25 litre jerrycan.
220 litre drum.
1000 litre tank.

Safety

Flammable. Do not smoke during the application.
Recommended extinguishers: powder, foam, or carbon dioxide.
For further information, consult our Safety Data Sheet.

Transport

- Class: 3.
- UN N° = 1268.
