

TECHNICAL DATA SHEET

SX PU FOAM CLEANER

A unique multi functional cleaner, that is designed to digest and remove uncured PU foam from the majority of gun grade and hand held foam applicators.

USES: The cleaners unique designed plastic moulding is an “all-in-one” component that includes a threaded collar with integral sealing valve and gasket. These features ensure that the PU foam cleaner is compatible with the majority of PU applicators.

Also incorporated into the component is a removable red aerosol actuator button with a clear short plastic tube. This tube dispenses fine accurate jets of cleaner direct to confined areas that require cleaning. This has the added benefit of being able to safely clean all PU foam canister valves, so that they can be safely re-used.

PACKAGING: 500ml aerosol packed 1 x 12

PREPARATION

Always connect/disconnect PU foam cleaner to the applicators with the canister in the upright position and at arms length. This will avoid accidentally activating the pressurised container.

APPLICATION

Remove the clear transit cap and red actuator button. Place the applicator gun upside down, screw the upright canister onto the inverted gun. Do not overtighten. This will break the integral sealing valve. Always operate the canister upside down and at arms length with the gun pointing away from the body. Press the trigger to flush the solvent through the gun, flush for at least 5 seconds and ensure the gun outlet tip is thoroughly cleaned. Place the canister upright, unscrew the canister whilst pressing the trigger. This ensures there is no build up of aerosol when disconnecting the gun applicator from the canister.

FINISHING

Collect all waste material into a suitable container and dispose in a safe manner. **DO NOT ATTEMPT TO CLEAN OUT APPLICATORS IF THEY ARE BLOCKED WITH CURED PU FOAM.** It is the user’s responsibility to dispose of all packaging correctly.

SX PU FOAM CLEANER TECHNICAL DATA SHEET CONTINUED**HEALTH & SAFETY****HAZARD WARNING**

Symbol: **F+**

Dangers: extremely flammable

This canister is pressurised, with Extremely Flammable Propellant and Solvent. Pressurised container. Protect from sunlight and do not expose to temperatures exceeding +50°C. Do not pierce or burn, even after use. Do not spray on a naked flame or any incandescent material. Keep away from sources of ignition – No Smoking. Keep out of reach of children. Without adequate ventilation, formation of explosive mixtures may be possible. Do not breathe spray. Use only in well ventilated areas.

LIMITATIONS

When using this product due care and attention must be observed prior to and while using this product, as one would do for any other aerosol product. Whilst this product was designed for use on the majority of PU foam applicators, it is prudent that the user ensures the item to be cleaned is compatible with this product.

LIABILITY

The information given is the result of our tests and experience and is believed to be accurate and reliable. However, as Siroflex Limited cannot know all the uses its products may be put to, it is the user's responsibility to determine suitability of us.
